

An abstract graphic on the left side of the page. It features several stylized human figures in various colors (blue, purple, red, green) connected by thin, glowing lines in shades of blue, pink, and yellow. Two thick, diagonal teal bars cross the graphic. The background is a light blue gradient.

## Franchise and Distribution

Venable's franchise lawyers represent many of the world's leading brands. We are trial lawyers with decades of experience litigating issues unique to franchising throughout the United States and in international arbitrations. We are also transactional counsel who guide franchise systems through development, licensing, franchise disclosure documents, and other business transactions.

Our attorneys have deep industry experience, representing and advising major players in the restaurant, consumer product, and hospitality realms—both nationally and internationally. This experience includes litigation related to trademarks, the implementation and enforcement of system standards, and commercial disputes. We've handled workout agreements and disputes for all sorts of service providers, fast-food chains, and food and beverage companies. With many of our lawyers serving as leaders in the major franchise industry trade groups, including the International Franchise Association and the American Bar Association's Forum on Franchising, we are well equipped to prepare franchise disclosure documents; franchise, license, and development agreements; and other contracts linked to franchising.
